## OBJECTIVE

---

Seeking an internship in software development to apply my programming skills and theoretical knowledge in a practical setting. Proficient in Python, R, C++, and web development. Passionate about competitive coding and eager to learn and grow in the industry.

## EDUCATION

---

**B.tech Artificial Intelligence and Data Science**, KJSIT

Expected 2024

Grade: 9.5 CGPA

**12th Grade**, CBSE, Narayana Vidyalayam, Chandrapur

2019 - 2020

Percentage Score: 91

## SKILLS

---

**Technical Skills**

C++, Python, Git, HTML, CSS

**Soft Skills**

Teamwork, Problem Solving, Analytical Thinking, Communication

## PROJECTS

---

### Sentivive

[Try it here](#)

Sentivive is an **accurate (87%)** YouTube sentiment analyzer that fetches comments from YouTube via **Google API**, uses **Flask** and **NLP** techniques for analysis, and displays results on its website. Its user-friendly interface and powerful insights make it a valuable tool for content creators and marketers.

### Spam Mail Classifier

[Try it here](#)

The Spam Mail Predictor is a tool that predicts whether a given email is spam or not. It uses the **Naive Bayes classifier algorithm** to solve the problem. The system has an impressive **accuracy rate of 89%**, indicating that the predictions it provides are reliable and useful.

### Secrets

[Try it here](#)

I created 'Secrets' using **Node.js**, featuring **Google sign-in and sign-up** options for user convenience. This web application allows users to share their secrets anonymously and also implemented security measures like **hashing and salting to protect user data**. This project showcases my skills in full-stack development and expertise in web security.

## ACHIEVEMENTS

---

- **Knight** at [Leetcode](#) with highest rating of **1867**. LeetCode is an online platform that provides coding challenges and mock interviews to help individuals prepare for technical interviews and improve their programming skills.
- **Rank 1** at [Geeks For Geeks](#) in **Problem Solving Section for my college**. GeeksforGeeks is a popular online platform that provides computer science resources, tutorials, and coding challenges to help individuals improve their technical skills.
- Secured **Rank 1** at Problem Solving challenge organised by IETE committee KJSIT and Geeks For Geeks.
- **3\*** at [Codechef](#) with highest rating of **1636**. CodeChef is a competitive programming platform that hosts monthly contests and challenges to help individuals improve their coding skills and prepare for coding interviews.
